#181 F. Enriquez St., Brgy. Panghulo, Obando, Bulacan

SKILLS AND EXPERTISE

- Test Planning & Strategy
- Test Case Design & Execution
- Automated Testing Tools (e.g., Selenium, Playwright)
- Manual Testing Techniques
- Defect Tracking & Management (e.g., JIRA, Redmine)
- Agile & Waterfall Methodologies
- Continuous Integration / Continuous Deployment (CI/CD)
- Black-box & White-box Testing Regression Testing
- Cross-browser & Cross-platform Testing
- Requirement Analysis & Documentation
- Strong Analytical & Problem-Solving Skills
- Excellent Communication & Collaboration Abilities
- Python / JS & TS / Java
- MS SQL server / Oracle
- Gitlab / Git
- Locust / Jenkins

PROFILE

QA/Test Analyst specializing in test automation and banking systems, with proven experience designing scalable frameworks using Selenium (Python) and Playwright (TypeScript). Strong background in validating complex application interfaces, with hands-on expertise in API testing using Postman and database validation through SQL.

Known for driving automation initiatives, including pioneering test data automation and end-to-end foreign exchange workflow testing to improve efficiency and reliability. Skilled in test strategy development, data-driven and modular framework design, and full test lifecycle management—from requirements analysis to defect resolution using JIRA.

Collaborative and delivery-focused, with a track record of partnering with cross-functional teams to ensure high-quality releases in agile environments while continuously improving QA processes.

WORK EXPERIENCE

We Support Inc. SEPTEMBER 2024 - PRESENT

Test Analyst

- Led QA efforts for banking application interfaces, delivering reliable and high-quality system integrations
- Built and maintained scalable automation frameworks using Selenium (Python) and Playwright (TypeScript), leveraging data-driven and modular design principles
- Automated end-to-end foreign exchange workflows and test data preparation, significantly reducing manual effort and improving test reliability
- Performed API testing using Postman and backend validation through SQL queries to ensure data integrity
- Managed defect lifecycle using JIRA, ensuring clear reporting, prioritization, and resolution
- Designed and executed test strategies, test cases, and regression suites aligned with business and functional requirements
- Collaborated with cross-functional teams and stakeholders, providing test reports, release sign-offs, and continuous process improvements.

CERTIFICATES

Google IT Automation (Python)
Verification: UUQ5JHL6B5QP

Crash Course on Python
Verification: HFKSSA6783VW

Interacting with the Operating System
Verification: Z44CTL8K2AZL

Introduction to Git and Github
Verification: ZCNYVY9PE846

Troubleshooting and Debugging
Verification: 5C2E5GG3XXM7

Configuration Management and Cloud
Verification: RVP9RJKS65FK

Automating Real-World Tasks (Python)
Verification: FFJN5DXTQ7GX

EDUCATION

2014-2019
DR. YANGA'S COLLEGES INC.

- Bachelor in Science Major in Mechanical Engineering
- Licensed Mechanical Engineer Board Passer
- Rating: 87.15

Primover Consultancy Services Inc. FEBRUARY 2023 - SEPTEMBER 2024
Software Unit Tester

- Identified, reproduced, and documented software defects using JIRA, ensuring efficient tracking and resolution
- Analyzed business requirements and functional specifications to design effective test strategies and coverage
- Performed exploratory and functional testing on new features and product builds to validate system behavior
- Designed and executed comprehensive test cases; conducted regression testing in each sprint cycle
- Developed and maintained automated test scripts using Selenium with Python in Visual Studio Code to improve test efficiency and coverage
- Created scalable and reusable automation frameworks for regression and performance testing, reducing manual effort
- Wrote and executed SQL queries in Microsoft SQL Server for backend validation, data integrity checks, and database testing
- Collaborated with QA engineers, developers, and cross-functional teams to align on testing strategies and ensure high-quality releases
